The COVID-19 Vaccine

Vaccines are one of the safest and most important public health tools to protect against serious illness and prevent the spread of dangerous diseases, like COVID-19. Specifically, vaccines help our bodies develop immunity to viruses and prevent us from getting sick. Review the Maryland Department of Health's [frequently asked questions](#) about the COVID-19 vaccine. Everyone 6 months of age and older is now eligible to get a COVID-19 vaccination. If getting a vaccine for a child under 5, check eligibility with the vaccination location before visiting. Everyone ages 5 and older is eligible for a booster shot.

It's Easy to Get Your Vaccine

Each week, the Baltimore County Department of Health will post a weekly vaccine schedule at www.baltimorecountymd.gov/vaccine, with a number of appointment slots. Appointments are preferred at all County locations, but will not be required. Residents who are medically homebound and unable to travel to a vaccine clinic should contact the Health Department at COVIDVax@baltimorecountymd.gov or call the County's COVID hotline at 410-887-3816 to schedule a vaccine.

AT-HOME TEST DISTRIBUTION: At-home test kits will be distributed at Baltimore County Public Library branches as the test kits become available. Please check with your local library branch for distribution schedules.

ADDITIONAL TESTING LOCATIONS: [Find other testing locations](#) across Maryland.

Free COVID-19 Testing

The Baltimore County Department of Health offers free testing options for residents.

Schedule an Appointment: [Click Here](#)

These appointments are critical - only schedule one per person. Do not schedule multiple appointments for the same person - this will prevent others from scheduling. The name and birth date that you provide on the form must match the name and birth date on your identification. If you prefer to be called by another name during testing, please inform the testing staff.
